

A MAKERSPACE HAS LANDED AT FRANKLIN TWP. SCHOOL

At FTS we are introducing a collaborative work space inside our school library. Students are encouraged to use this space during the school day, for making, learning, and exploring.

This new area will provide hands on learning, help with critical thinking skills and even boost self-confidence needed in the 21st Century.

What is in our new space? 3D printer, whiteboard tables for brainstorming, microscopes, building materials, iPads, Chromebooks etc. and many more hands on materials to spark creativity and the learning process.

4th Grade Sound Project

7th Grade Prosthetic Project

6th Grade using Microscopes

Coming soon!! LEGO WALL
